

Our range of services in the Overview

Use my expertise in: Methodology, systematics, natural science, mathematics, robotics, materials science, biocompatibility, polymer technology, medical technology, measurement and testing technology

Let's take a look at your task and let us achieve the goal together. If no way can be found, then we will make a way.

Andreas Reinmann, Manager GAUSSTEC

Research

Analysis of existing Technology

Analysis and evaluation alternative Technologies

Feasibility Study

Industrial research (processes and technologies)

Planning and construction of Equipment for Manufacturing processes

Process and Technology verification

Medical techn.

Biocompatible Materials and Design

Design for implants

Risk analysis / FMEA

Aging under physiological Conditions

Soft tissue implants

Instruments for Cartilage transplantation

Engineering

Load analyses

Stress analyses

Service life analysis

Event calculations

interpretation of Measurement results

Creation of test and Verification Criteria

Feasibility Study

Systematics R & D

System delimitation

Holistic analysis

Functional Analysis

Impact analysis

Design morphology

Patents

Specialist support for Patent applications (MedTech / implants
 Disposables / test procedures / etc.)

Patent search (feature analysis / Evaluation state of the art / etc.)

Expert support for the Review of Freedom to Operate

Circumvention strategies
